PROFESSIONAL SUMMARY

Dynamic Computer Science and Engineering student specializing in Artificial Intelligence, Machine Learning, and Python development. Proven track record combining strong analytical skills with success in national-level hackathons, translating complex algorithms into impactful, Generative AI and ML-powered solutions.

EDUCATION

Shobhit Institute of Engineering & Technology

Bachelor of Technology in Computer Science and Engineering

Meerut, Uttar Pradesh

Aug 2023 – Present

Relevant Coursework: Artificial Intelligence, Machine Learning, Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Data Mining, and Web Technologies.

PROJECTS

AI Portfolio Maker | Python, Flask, HTML/CSS/JS, Gemini API

[[View Project](#)]

- Engineered a dynamic web application that autonomously generates custom, live portfolios directly from user resumes using Generative AI and the Gemini API.
- Designed a scalable backend with Flask and Python to process resume data efficiently and seamlessly render the output.
- Built an intuitive, responsive frontend interface utilizing HTML, CSS, and JavaScript for real-time portfolio visualization.

Multifunctional AI Assistant | Python, Streamlit, Generative AI

[[View Project](#)]

- Developed a comprehensive AI assistant leveraging Large Language Models (LLMs) to automate system tasks and deliver advanced conversational capabilities.
- Integrated Generative AI features to autonomously draft code snippets, build application templates, and generate text-to-image outputs based on user prompts.
- Engineered a robust troubleshooting module designed to help users efficiently debug and solve complex programming challenges.

Used Vehicle Price Intelligence System | Python, Machine Learning, Streamlit

[[View Project](#)]

- Engineered an ML-powered intelligence system using Python to accurately estimate fair used car prices and detect market manipulation.
- Implemented predictive models, including K-Nearest Neighbors (KNN) and Decision Trees, to analyze market attributes and flag extreme price deviations.
- Deployed a clean, interactive Streamlit web dashboard for real-time risk assessment and data-driven market insights.

TECHNICAL & SOFT SKILLS

- Languages:** Python, C, C++, Java, JavaScript, SQL, HTML/CSS
- AI/ML & Data Science:** Machine Learning, Generative AI, LLMs, Computer Vision, Data Mining, Pandas, NumPy, Scikit-learn
- Frameworks & Web:** Flask, Django, Streamlit
- Developer Tools:** Git, GitHub, VS Code, Jupyter Notebooks
- Soft Skills:** Rapid Prototyping, Analytical Problem Solving, Algorithmic Thinking, Effective Communication

ACHIEVEMENTS & CERTIFICATIONS

- Winner, Internal Smart India Hackathon 2025:** Selected directly from the University level to represent the institution at the national-level innovation showcase.
- Certificate of Excellence in Machine Learning:** Successfully completed an advanced ML course conducted by Summer Analytics 2025 in association with IIT Guwahati.
- Hackathon Participant, AI Planet:** Demonstrated rapid prototyping and complex problem-solving skills in an AI-focused competitive environment.
- Python Course Completion, HCL:** Successfully Completed the Python course from GUVI by HCL.
